## June Specials—Angel Messages and Gifts

### Celebrate International Fairy Day!

It's time to celebrate our beloved nature angels, the fairies, on International Fairy Day this June 24. The fairies are so happy to help us care for the earth and its inhabitants. One of the roles the fairies play is serving as guardian angels to animals. Here are some ways you can connect with the fairies:

- Ask the fairies to help with any medical issues related to an animal. Archangels Ariel and Raphael and Saint Francis are also great helpers of animals in need of healing.
- Before driving, call on the fairies to clear your path and ensure that any wildlife or other critters stay out of the roads on which you will be traveling.
- If your pet is experiencing any kind of challenge—physical or emotional—immediately call on their guardian fairies to bring light and healing to the situation. Ask for their guidance in helping you find the perfect resources to assist your fur child(ren).
- Invite the fairies to help you with any gardening projects. They can breathe new life into sick plants as well as guide you as to any steps you can take to nourish your green friends.
- Look for ways you can help nature. There are endless opportunities to give of your time and other resources.

The fairies are wonderful, fun and creative helpers and problem solvers. Take a moment to step outside and connect!

### Did You Miss a Newsletter?

Did you know that prior issues of Angel Readings by Kelly's Specials—Angel Messages and Gifts are available at [www.AngelReadingsByKelly.com](http://www.AngelReadingsByKelly.com)?

Go to the *Specials and Other Goodies* tab and click *Past Monthly Sessions*. It's a great way to learn about the angels, fairies and other divine helpers as well as receive help connecting with them.

### A Message to the Dooms-dayers from Archangel Michael

Much energy and resources are being wasted by those who are afraid of earthly changes or other disasters. Earth has always, and will always be going through changes. Floods, earthquakes, tornadoes, etc. are nothing new and are part of the Earth's cycles, very much like your own earth bodies have cycles. Of course, you want to be mindful and aware, as well as respectful and caring for your home, but do not lose your lives to fear.

Every day is a gift from the Creator. It is meant to be cherished and used for your soul's learning and advancement. Time spent forecasting these disasters, and for some, even experiencing negative feelings *in anticipation*, is an exercise in futility and comes at great cost.

When you spend your energy time travelling, either to the past to rehash history, or to the future, you are missing the only moment you have—now. Call on me to help you with your fears and to shield you from negativity which robs you of joy, energy and positive experiences.

## June Reading Specials
